## SAFE SEED PLEDGE

Agriculture and seeds provide the basis upon which our lives depend. We must protect this foundation as a safe and genetically stable source for future generations. For the benefit of all farmers, gardeners and consumers who want an alternative, **we pledge that we do not knowingly buy or sell genetically engineered seeds or plants.** The mechanical transfer of genetic material outside of natural reproductive methods and between genera, families or kingdoms, poses great biological risks as well as economic, political and cultural threats. We feel that genetically engineered varieties have been insufficiently tested prior to public release. More research and testing is necessary to further assess the potential risks of genetically engineered seeds.

We offer many old-fashioned varieties which we have grown and tried to have some good tasting vegetables to offer you. We grow plants for their uniqueness in taste and look, different colors and shapes and most of them we find in old-fashioned plants.

By growing these older varieties you will help to preserve our vegetable heritage which is rapidly being replaced by hybrids and genetically altered varieties
